

# Fatima Oluwalogbon

I am a Self-taught front-end web developer. I am excited to apply for this role although I am an entry-level applicant, I'm passionate about doing an outstanding job. I am passionate about producing clean and readable code, collaborative, quick critical thinking and logical technical skills to improve work efficiency.

I am interested in moving my career forward in the web and software development field.

I believe I will make a good and excellent front-end development to your team.

I am proficient in using Html, Css and Javascript. My favorite css framework is bootstrap. I used git and github for version control. Also a beginner in using react.

I'm an open-minded individual who loves learning new technologies.
